SUMMARY

With 4 years of experience as a React Developer, I have built robust, scalable web applications for various projects, including SaaS and ERP integrations. My passion for creating engaging interfaces and deep understanding of front-end and back-end technologies (ReactJs NodeJs) allow me to work effectively in cross-functional teams. During my career, I have worked in various teams, from small ones of 4 people to large ones of 50 people, with more than 5000 in the company. I have participated in stack and architectural discussions and worked on Kanban and Scrum methodologies.
